

chemical processing aids in pdf

Safer Choice groups processing aids (a large set of chemicals that play supporting roles in product formulations) as a single class, with tailored criteria for each subclass. These chemicals, often considered commodity or generic ingredients, are diverse in structure and function, but have in common, beyond their formulary supporting roles, that their chemical characteristics and long-standing safe use make them a low hazard concern. For example, physical-chemical properties (like simple ...

Safer Choice Criteria for Processing Aids and Additives

Additionally, our processing aids come in a liquid form that can be easily and accurately metered into the process stream through the use of a diaphragm pump or by using Hydrite™s Ex-Zact Flo metering system.
