SURFACES OF CONSTANT MEAN CURVATURE

In this article we survey recent developments in the theory of constant mean curvature surfaces in homogeneous 3-manifolds, as well as some related aspects on existence and descriptive results for ...

Constant-mean-curvature surface. In differential geometry, constant-mean-curvature (CMC) surfaces are surfaces with constant mean curvature.[1][2] This includes minimal surfaces as a subset, but typically they are treated as special case.

surfaces of possibly varying constant mean curvature (the case of minimal leaves is included as well). Many of these results extend to the case of codimension one laminations and foliations in n-dimensional Riemannian manifolds by hypersurfaces of possibly varying constant mean curvature.

Self-Parallel Constant Mean Curvature Surfaces Kenta TOYAMA January 27, 2004 Abstract It is a classical result that surfaces made from a constant mean curvature (CMC) H surface by moving in the normal direction the distances $1=2H$ and $1=H$, respectively, are of constant Gaussian curvature $K = 4H^2$ and of constant mean curvature $\hat{A}H$, respectively.
